Description

Designed for accuracy and performance in a compact design the T6 Series of Vis Spectrometers offer wavelength accuracy as low as +/- 1 nm combined with low stray light of less than 0.05%T. With a focus on reliability in a compact footprint, Persee's entry level Spectrometers set a new bar for value and capability.

Refurbished Laboratory Equipment
With Warranty

- Low stray light
 - Excellent stability
 - Split Beam Optical System
 - 5 cell holder/ or 8 cell holder
 - Dual Photodiode Detector
 - Tungsten Light Source
 - WL Range: 325-1100 nm
 - WL Accuracy: +/- nm
 - Stray Light: 0.1% T
-
